Index by subjects

Compiled by Janine M. Ross

The index is arranged alphabetically word by word, so that CONSUMER SURVEY precedes CONSUMERS.

Since the main subjects of this title are Food and the UK, entries have been kept to a minimum under these keywords and readers are advised to seek more specific entries. Cross references have been inserted to avoid confusion.

Notes for CONTRIBUTORS

British Food Journal will only publish original contributions and also outstanding papers delivered at conferences, seminars, etc.

All manuscripts and editorial communications should be sent to the Editor, Brian Beharrell at Cranfield University, Silsoe College, Bedfordshire MK45 4DT, UK.

Copyright
Authors submitting articles for publication warrant that the work is not an infringement of any existing copyright and will indemnify the publisher against any breach of such warranty. Papers and contributions published become the legal copyright of the publisher, unless otherwise agreed.

Editorial objectives
To provide a scholarly vehicle that will foster a greater understanding of the methods and motives among all those involved in the food sector. With quality and value gaining pre-eminence within the industry the journal seeks to keep pace with this movement and inform its readers of the issues that affect them.

General principles
(a) It is our intention to encourage communication between those who produce, regulate and market within the food system.
(b) Contributors are encouraged to spell out the practical implications of their work.
(c) Articles based on experiences and evidence are particularly welcome.

Article length
Articles should be no longer than 4,000 words; shorter articles are welcome. A word count must be included.

Presentation
(a) Send three copies of your article in typescript with wide margins and double spacing.
(b) Please date your manuscript, and ensure that revised manuscripts are numbered in order and dated.
(c) A brief autobiographical note should be supplied including full name, appointment and name of organization.
(d) Please suggest a title for your article of not more than eight words.
(e) Please supply the article on paper of no less than 80 gsm weight with high quality print. This will enable electronic scanning if needed.

Headings and sub-headings
Headings should be typed in capitals and underlined. They should come at roughly 750-word intervals, but this is only a general guide. Sub-headings within the main headings should be typed in upper and lower case, and underlined.

Footnotes
Footnotes must be kept to a minimum and must be numbered consecutively throughout the article.

References
(a) References to articles
The author's name (surname followed by initials of first names); title of article (in quotation marks); name of the publication in which it appears (underlined); volume and issue number; date of publication; beginning and ending page numbers.
Example: Robinson, T.H. and Paine, Y.K., "Consumer attitudes to irradiation", *Food Policy Issues*, Vol. 4 No. 3, 1986, pp. 6-24.
(b) References to books or reports
The author's name (surname followed by initials of first names); title of the book (underlined); name of publisher; year of publication; page numbers where appropriate.
Example: Brown, F.J., *What We Eat*, Blackrock Press, London, 1987.
All references must be numbered in the text in the order 1, 2, 3... etc.

Charts, diagrams and figures
Charts, diagrams and figures should be numbered consecutively and in any event called figures. Every figure must have a number in arabic numerals, a brief title and labelled axes. Indicate in the text where you wish the figure to appear. Send good artwork.

Tables
Tables should be numbered consecutively and independently of any figures you may include. Each table must have a number in roman numerals, a brief title, and headings down and across. Indicate in the text where you wish the tables to appear. Type tables on separate sheets of paper: do not include them in the main body of the text.

Abstracts
Authors are requested to supply an abstract of about 150 words when submitting an article. It should be an abbreviated, accurate representation of the contents of the article. Major results, conclusions and/or recommendations should be given, followed by supporting details of method, scope or purpose, as necessary. It should contain sufficient information to enable readers to decide whether they should obtain and read the entire article.

Keywords
Authors should also provide 1-6 keywords or descriptors that clearly describe the subject matter of the article. These terms have two purposes: to help describe the subject content of an article to prospective readers; to index the article for retrieval from a database or bibliography. Such keywords might include:
- *Country, geographical area*, e.g. Africa, Sweden, Developing countries
- *Industry*, e.g. Banking, Aircraft industry
- *Organization/organization-related*, e.g. Small business, Multinational, Corporate image
- *People*, e.g. Consultants, Trainers, Top management
- *Broad functions*, e.g. Marketing, Production management
- *Specific functions*, e.g. Sales promotion, Scheduling
- *Management and managerial activities*, e.g. Matrix management, Policy making, Decision making
- *Other processes and subject areas*, Industrial relations, Economics, Politics, Quantitative methods, Research.

Not all of these aspects will be applicable to a particular article. Some articles will require more terms than others.

The reviewing process
Each article submitted to *BFJ* is subject to the following review procedures:
(a) It is reviewed by the Editor for general suitability for this publication.
(b) If it is judged suitable, two reviewers are selected and a double blind review process takes place.
(c) Based on the recommendations of the reviewers, the Editor then decides whether the particular article should be accepted as it is, revised or rejected.

Submission of disks
Once an article has been accepted for inclusion within the journal disks should be supplied with manuscript whenever possible. Contributors in a position to comply with this request should submit any 3½" disk prepared on a PC or Macintosh system in ASCII format. Please ensure that disks are labelled clearly (title, author, draft 1, draft 2, etc.).
